I concur that the E-Rate program should be heavily funded in order for all students to not only have access in schools but in their homes. I would love to see that all students in the urban areas have either an Ipad or a similar tool to take home with them in order for them to have access to grades, edmodo, research sites, and all other resources found online. We cannot allow to widen the gap between the "rich" and the "poor". All students should have the same resources no matter what neighborhood they come from.
